

Euphorbia

Plant Features

- Loves full sun
- Drought Tolerant
- Grows well in difficult soils
- Striking habit, adding texture to any garden

Uses in the Garden

- Traditionally used as bold, accent plants in perennial borders
- Euphorbia also looks great on mass in modern gardens mixed with bronze New Zealand Flax

Care

- Feed with a complete fertilizer once to twice a year
- Cut back hard after flowering
- Euphorbia are very drought hardy though may need extra water in hot dry weather
- Occasionally Euphorbia will benefit from dividing. Dig the plant up and cut the clump into 3 or 4 pieces then replant. Dividing helps to invigorate perennials.
