Create the garden
of your dreams

At Town & Country Gardens, we can turn your ideas for your garden into a reality. Whether it's a small balcony garden, a beach house retreat, a large estate in the country, or anything in between, everyone deserves their own private oasis, and we can help you get it!

Our qualified horticultural team can give you helpful advice to fix up an existing garden, or design a new garden from scratch. We're here to help you create the garden of your dreams.

Our services

Initial consultation

The design of your garden begins with an initial meeting on site. We will assess your site and establish the design brief by understanding your aesthetic, functional and budgetary requirements. Following on from the initial consultation, we will prepare a fee proposal for undertaking the design.

The initial consultation costs \$95.

Concept design

A concept plan provides the client with an overall idea of how the garden will be created. It outlines the proposed landscape design including all hard (paving, decks, pergolas etc.) and soft (plants and vegetation) elements of the garden along with a material and plant schedule. Our plans are accompanied by images to set a mood of how your garden will look and feel.

Indicative cost \$900 - \$2500.

Detailed Documentation

More often than not, a concept plan is sufficient to devise an accurate quote for a project and bring it to the stage where construction can begin. For more complex projects or specific jobs within a design we can provide more detailed information. This might include:

- * Construction drawings and elevations
- * Lighting plans
- * 3D modelling of house and garden
- * Planting plans that show plant layout along with species list, quantities and sizes

Construction/Hard Landscaping

We can manage your project from start to finish. Our professional and experienced staff can look after all horticultural aspects of your garden implementation.

We also have access to a team of professional landscaping contractors who can build your garden to the highest possible standards, maintaining the integrity of your design. Alternatively you may wish to engage your own contractors, who we can brief and liaise with.

Follow up consultation

After we have completed your project, we will visit the site to assess the condition of the plants and advise on any ongoing maintenance. There is no charge for this consultation, which is valued at \$75.

Advisory consultation

We also offer a basic consultation service for those after just a little advice. We can make recommendations and give advice on plant selection and positioning, pest and disease management, soil health, irrigation and drainage as well as structural elements in the garden.

Advice is given on the spot, and no plans or written report are prepared. For follow up advice and suggestions that come out of this consultation, you are welcome to come in and speak to nursery staff. This consultation is not suggested for those who need working drawings or construction plans.

The cost of the stand alone consultation is \$95.

Horticultural Services

Our qualified team of horticulturalists can assist you with gardening services that will keep your garden in shape and improve it over time. We can assist with:

- * Pruning and hedging
- * Mulching and feeding
- * Planting, re-potting, dividing and transplanting
- * Setting up a vegetable garden
- * Plant pest and disease diagnosis and management
- * Installing an irrigation system
- * Laying an instant lawn or reseeding your lawn
- * Improving soil structure and fertility
- * Garden 'health check'
- * Performing regular garden tasks
- * Garden makeovers
- * Getting your garden ready for a house sale
- * Indoor plant styling

MEET OUR DESIGNER

AL RADOVANOVIC **GARDEN DESIGNER**

Our garden designer, Al Radovanovic brings with him a wealth of valuable horticultural and design experience that spans more than 20 years.

Starting his career as a trainee at Melbourne Zoological Gardens and most recently with his own boutique garden design studio in Melbourne's north, Al has worked with several award winning landscaping firms and premier nurseries.

Al has excellent plant knowledge, extensive experience in designing and creating the supporting structural elements that give an outdoor space its' form and foundation.
